DETAILED ACTION

Remark

- This Office Action is in response to Panel Decision from Pre-Appeal Brief Review set forth in October 11, 2006. The request for the Pre-brief conference is filed on August 30, 2006.
- Claims 7, 9-14, 16-24 and 26-30 remain pending in this application.

Conclusion

1. This application is in condition for allowance except for the following formal matters:

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “*thin film formed to cooperate with a photomask including an opening such that light is transmitted through the opening in the photomask through the thin film onto the wafer to project an image of the photomask opening onto the wafer wherein a portion of the transmitted light is diffracted by the photomask opening and passes through the thin film at angle of incidence greater than zero*” as recited in claims 7, 17 and 26 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be

necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

3. Claims 7, 9-14, 16-24 and 26-30 are allowed.
4. The following is an examiner's statement of reasons for allowance: of the prior art references considered, none has disclosed a *pellicle* that is comprised of a *frame* and an *amorphous fluoropolymers thing film* for projecting a *photomask image* onto a *wafer* in a *photolithographic process* wherein the thin film has an *optical thickness* that is **greater** than a *design thickness* by an amount *less than or equal to one-quarter of the particular wavelength* of the incident light at *an angle of incidence greater than zero*, such that the transmission of this incident light is *maximized*. The design thickness of the thin film is the optical thickness of the thin film that maximizes transmission of light incident to the thin film at a normal angle. The thin film is formed to cooperate with a *photomask* including an opening such that the incident light is *transmitted* through the opening in the photomask *through the thin film* onto the wafer to project an image of the photomask opening onto the wafer wherein a *portion of the transmitted light* is **diffracted** by the photomask opening and then **passes** through the thin film at angle of incidence **greater than zero**. The transmission of this portion of the incident light is therefore maximized.
